

Match the limit to the claim.

Supplement to the original source register. Original evidence texts and numerical caveats are retained.

Item / source	Clarification in the revised game
RU1 / RU-A	Levada produces the survey. Its report of ballot exclusion does not adjudicate registration grounds or compare treatment of applicants.
RU2 / RU-B	The sentences are 2023 background to 2024. The report does not measure the amount of electoral capacity lost before/after them.
RU5 / RU-E	Check whether an original detention number counts people or incidents. The card does not turn those units into a national competitiveness measure.
MY1 / MY-A	Plurality in a district and a majority of seats are different units. Aggregate conversion does not establish biased boundaries or why votes were geographically distributed.
MY3-5 / MY-B, MY-D	IPU election summaries supply narrative context. DOJ material records legal allegations and action, not a conviction or a measured voting response. Shared narratives are not independent checks.
MY6 / MY-E, MY-F	Later reform can show post-turnover opportunities or constraints. It cannot cause the earlier May victory.
MW3 / MW-B, MW-C, MW-D	MW-D is now also associated with MW3. Legal analysis and the direct-judgment retrieval caveat accompany the court sequence. Invalidation, remedy and majority interpretation are distinct; personal culpability is not established.
MW4 / MW-C	A joint ticket does not track individual vote transfer. The reported 2020 winner had both a majority and the largest share; strategic effects of the threshold need separate evidence.
MW5-6 / MW-C, MW-E	Implementation reporting does not establish compliance motives. Reported shares concern different contests. Conflicting exact official totals remain disclosed and unexplained.
RS2-3 / RS-A	Real alternatives can coexist with unequal conditions. Selected broadcast content does not measure equal reach, individual exposure or persuasion.
RS5-6 / RS-A	Pending and rejected remedies differ; the window does not establish permanent impossibility. Ballot-to-seat conversion alone does not prove unfair campaigning or unequal enforcement.

Use the original register for complete titles, dates, locators and links. The game retains those records. A caveat is analytically useful when it narrows the particular claim you make, rather than merely appearing cautious.
